APPLICATION FEATURES

Restaurant Features

- Choose Hard or Soft check posting. Operate up to 4 open check files, or two open and two closed check files. Track balances by table or check number. Service keys can be programmed to finalize with or without check printing.
- Assign items to a seat number when pre-checking to identify orders for preparation and/or facilitate separate payments.
- Use the Hold/Fire feature to control the requisitioning of items/orders from the kitchen.
- Another round? Press the "Repeat Order" key to duplicate the previous posting.
- Divide balances for separate payments when the check is paid.
- Transfer balances from table to table; Transfer checks from server to server; Add multiple checks for payment.
- Control security by assigning each employee to a predefined authority level. Up to nine authority levels can be set up by enabling specific operations from a list of over 40 security sensitive operations.
- Clock controlled functions – price changes, menu changes, or special report sequences can be set to take place automatically by day of week and time of day.
- Recipe and ingredient inventory system available.

Quick Service

- Access up to five separate price levels for each PLU to easily ring up a different price for the same item.
- Store and recall drive-through and phone-in orders. (Use up to 4 separate tracking files.) Discounts or coupons can be added or voided at the time of pick-up.
- Use the modifier functions to access different PLU items through logical key sequencing. For example, press large (mod1), then 3-topping (mod 2), then pizza to access the unique PLU for a large, 3-topping pizza. Up to ten different modifier keys can be used to describe an item.
- Use the Promo and Waste functions to keep inventory recorks accurate when inventory is used, but not sold.
- Product Mix Groups track key inventory usage.

Retail

The high capacity PLU file (20,000+ items are possible), together with optional UPC scanning input open many application possibilities for the SPS-1000 in small to medium retail environments. Food stamp sorting and tendering for retail food sales. Gallonage calculation for gas / convenience store applications. RS-232C interfacing is available for scale and video surveillance systems.
